

# PODO-DISC & Files for Perfect Pedicure

# PODO-DISC & FILES

**SIZE: XS**  
**10 Ø**

**MATERIALS**

metal

**Podo-Disc 10 mm**

**Universal for manicure and pedicure**

- Perfect for working on the nail plate.
- Can be used with a 5 mm buffer of various grit levels for smoothing and polishing.
- Convenient for treating side nail folds.
- With a 1 mm file – an effective tool for opening cracks and treating deep keratosis.

\*Custom branding and set configuration available on request.

150

180

220

**USAGE**

Extra coarse grit. Ideal for removing thick layers of acrylic, hard gel, or polygel. Not suitable for natural nails.

Coarse grit. Suitable for shaping and shortening artificial nails. Not recommended for natural nails.

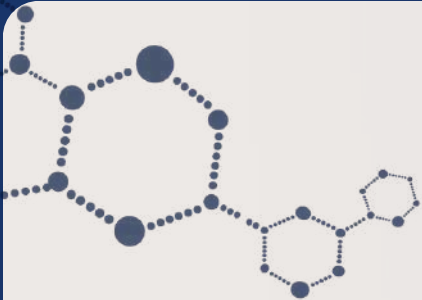

Medium-coarse grit. Used for refining and shaping artificial nails. May be too aggressive for natural nails.

Medium grit. Universal option for prepping natural nails before applying products and for light filing of artificial nails.

Medium-fine grit. Used for gentle filing of short natural nails.

**USAGE**

Extra coarse grit. Ideal for initial treatment of heavily callused skin, removing thick calluses and treating deep cracks.

Coarse grit. For effective removal of hardened skin and preparation of the foot for further polishing.

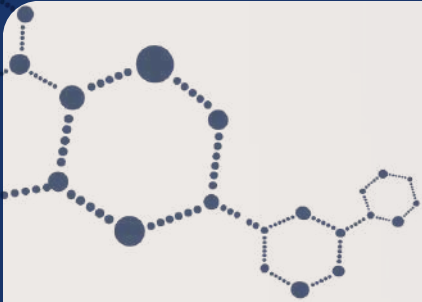

Medium-coarse grit. A versatile option for basic skin smoothing, suitable for feet with medium callus buildup.

Medium grit. For gentle skin refinement, final surface smoothing, and polishing before completing the procedure.

Medium-fine grit. For soft polishing and achieving a silky-smooth skin effect. The perfect finishing step in a pedicure.

# PODO-DISC & FILES

**SIZE: M**  
**20 Ø**

**MATERIALS**

metal

**Podo-disc 20 mm**

**The most versatile Podo-disc**

- Standard size for pedicure and foot treatment.
- Suitable for treating toes from the sole side.
- In manicure, used for refining and precisely shaping the length of sculpted nails (especially popular for creating a square shape – a current trend on TikTok).
- It is recommended to have a full range of file grits and thicknesses (1 mm, 2 mm, 5 mm).

\*Custom branding and set configuration available on request.

# TOOL FOR PEDICURES & FILES

**SIZE:**  
**250x45x135**

**MATERIALS**

**Perfect Smoothness and Well-Groomed Feet**

A professional pedicure file is an essential tool for the effective and safe removal of callused skin, corns, and dry calluses. It provides a gentle, controlled action – allowing you to achieve perfectly smooth skin without causing injury.

**Benefits:**

- Ergonomic shape – comfortable to use, non-slip grip
- Double-sided working surface with the option to apply different grits on each side – for intensive treatment and final polishing
- Lightweight and durable construction – built to last
- Suitable for both professional salon use and home care
- Easy to clean and disinfect

\*Custom branding and set configuration available on request.
